Amadeus Altéa Inventory for Altéa DC-CM Standalone

This course provides an overview of Altéa Inventory's system architecture and integration with Altéa Departure Control - Customer Management, focusing on seat management and scheduling. Through practical exercises learn how to create and maintain aircraft configurations, seat maps, and seating business rules, that impact the departure control system during the flight operational window.

On this course, you will learn to:

- > Identify Altéa Inventory's system architecture.
- > Navigate Altéa Inventory and Messenger viewer.
- > Create seat maps and work with different templates.
- > Set up flight schedules and activate flights in Customer Management.
- > Recognize how schedule changes affect passenger reseatng.
- > Investigate and resolve issues, such as locked flights.

This course covers the following topics:

- > Altéa Inventory's system architecture and Messenger viewer
- > Market groups, flight groups, and business rules
- > Seat maps and their templates
- > Seat rules and their impact on seat maps
- > Flight schedules and when they are triggered to Customer Management
