

Instructor-Led

Amadeus Security Management for Altéa Flight Management Operations

This course explains how to use Amadeus Security Management (ASM) to manage authentication, access control and security administration across Amadeus products. The course includes hands-on exercises focused on configuring access rights specifically for Altéa Departure Control - Flight Management.

On this course, you will learn how to:

- > Navigate Amadeus Security Management.
- > Define the security setup for an airline.
- > Identify and apply security elements to Altéa Departure Control - Flight Management user access.

This course covers the following topics:

- > Managing organisations and users
- > Navigating ASM.
- > Managing access rights.
- > Managing partnerships between organisations.
- > Deleting roles, offices, and organisation units.
- > Completing practical exercises.
