Altéa Departure Control - Flight Management

As a Load Controller, discover how Amadeus helps you to manage passengers and baggage, cargo, and fuel with precision, to boost productivity in your load control operations.

On this course, you will learn:

> How Altéa Flight Management interacts with other products
> How to navigate Flight Management
> How to add flight operating data
> How to navigate the Flight Information screen
> How to read messages, statuses and the Centre of Gravity graph
> How to read the Joining Passengers display and modify flight details
> How to identify an aircraft's weight, traffic load and forecast zero fuel weight
> How to build a Dry Operating Weight and Index
> How to manage deadload for a flight
> How to manage the load distribution
> How to manage fuel for a flight
> How to manage passenger and baggage figures
> How to update load and ramp clear
> How to depart a flight

Through a set of interactive e-Learning lessons, learn how Altéa Flight Management (FM) optimises load planning for baggage and cargo, manages fuel distribution, calculates the aircraft centre of gravity and issues documents and messages for flight departure.
