

Instructor-Led

Amadeus Altéa Inventory for Altéa DC-FM standalone

This course offers a comprehensive overview of Altéa Inventory's system architecture and its integration with Altéa Departure Control - Flight Management, with an emphasis on seat management and scheduling. Participants will engage in practical exercises to develop and maintain aircraft configurations, design seat maps, manage flight schedules when flights are locked, and oversee the SET process.

In this course, you will learn:

- > Identify Altéa Inventory's system architecture.
- > Navigate Altéa Inventory and Messenger viewer.
- > Create seat maps and work with different templates.
- > Set up flight schedules and activate flights in Flight Management.
- > Investigate and resolve issues, such as locked flights and manage Schedule Entry Table (SET).

This course covers the following topics:

- > Altéa Inventory's system architecture and Messenger viewer
- > Market groups, flight groups, and business rules
- > Seat maps and their templates
- > Flight schedules and when they are triggered to Flight Management
- > Manage Schedule Entry Table (SET)
- > Schedule business rules, both mandatory and optional
- > Business rules for DCS triggers and Res-DCS exchange

Certification:
No

Duration:
2 days
